please do not report the images to the
Image Problem Mailbox.**

Spring loaded button that may be activated by energy created by pressing or pushing upward each time you want clean sterile floss, or it could be prewound like a watch. Several methods could be used to accomplish this. In addition, various mechanisms can be used to adjust how much floss is renewed with each press of the button. Could be preset or adjusted to individual preferences i.e. most likely 1-6" at a time

Disinfecting foam lined for incoming used floss
